

USED LAPTOP INSPECTION REPORT

2026-10-04 12:45 • HP-ELITEBOOK • Report v3.0

Microsoft Windows 11 Pro • Build 26200 • 64-bit

Important: This report is an electronic inspection aid. It cannot detect every physical defect (cracks, liquid damage, worn hinges, dead pixels, battery swelling). Always inspect the laptop physically before paying.

75

/ 100 • GOOD

CHECK CAREFULLY

Positive

- + 15.9 GB RAM (acceptable for basic use)
- + SATA SSD (good storage)
- + Storage health reported OK
- + Good CPU
- + Integrated graphics (fine for office / study)
- + TPM present (helps Windows 11)

Warnings

- Battery health 62.6% (fair / worn)
- Only 2 cores

1. System Overview

Manufacturer	HP
Model	HP EliteBook 820 G4
Type	Laptop / Portable
Windows	Microsoft Windows 11 Pro (64-bit)
Version / Build	10.0.26200 / 26200
Activation	Activated
Install Date	2026-09-19

2. Processor (CPU)

The CPU is the brain of the computer. It determines responsiveness, multitasking ability and efficiency.

Processor	Intel(R) Core(TM) i5-7200U CPU @ 2.50GHz
Family	Intel Core i5
Generation	7th Generation
Suffix / Series	U U-series
Category	Low power — Office / travel / battery life
Cores / Threads	2 / 4
Max Clock	2712 MHz
Integrated Graphics	Usually yes

CPU Suffix Guide

Suffix	Power	Typical Use	iGPU
U	Low	Office / travel / battery life	Usually yes
Y	Very Low	Basic portable	Usually yes
P	Medium	Thin/light performance	Usually yes
H	High	Gaming / editing	Usually yes
HK / HX	High–Very High	Max mobile performance	Usually yes
K / KF	High	Desktop gaming / overclocking	K usually yes* / KF no
F	High	Requires dedicated GPU	No
T	Lower	Efficient desktop	Usually yes*

Suffix describes the family. Exact integrated-graphics capability depends on the specific model. Always verify the exact processor.

3. Battery Health

Battery detected	Yes
------------------	-----

Design Capacity	44574 mWh
Full Charge Capacity	27896 mWh
Calculated Health	62.6% Fair
Cycle Count	1146
Name	Primary
Status	OK
Current Charge	93%

This means the battery currently stores approximately **62.6%** of the capacity it could store when new.

90–100% Excellent • 80–89% Good • 60–79% Fair • Below 60% Worn. A worn battery still works but needs more frequent charging or eventual replacement.

4. Memory (RAM)

RAM is short-term working memory. More RAM keeps more programs and browser tabs running smoothly.

Total RAM	15.9 GB
Modules	1
Module Details	16 GB • 2133 MHz • Samsung • M471A2K43BB1-CPB

Acceptable for basic office work and browsing. May feel limited with many tabs or heavier apps.

Check whether RAM is soldered or upgradable, and single- vs dual-channel, before buying.

5. Storage

SSD (especially NVMe) is much faster and more resistant to physical shock than mechanical HDD.

Windows Disk Info	AZEK SSD 512GB • 477 GB • Fixed hard disk media • IDE
Physical Disk Info	AZEK SSD 512GB • SSD • 477 GB • Health: Healthy • Bus: SATA

NVMe = very fast. SATA SSD = good for normal use. HDD = slower and more fragile. Windows health status is useful but not a full SMART test.

6. Graphics (GPU)

GPU Information

Intel(R) HD Graphics 620 • VRAM: 1 GB • Driver: 31.0.101.2140
• 1366x768 @ 60 Hz

Integrated graphics are suitable for office work, university tasks, web browsing, video playback and light photo editing. Not intended for demanding modern gaming.

7. Display

Detected Monitor(s)

N/A • Serial: 0

PHYSICAL TEST REQUIRED Check dead pixels, brightness, backlight bleed, flicker, hinges and touch functionality. Panel type (IPS/TN/OLED) is not exposed by Windows.

8. Windows Performance (WinSAT)

CPU Score	8.6
Memory Score	8.6
Graphics Score	5.6
Gaming Graphics	9.9
Disk Score	8
WinSPR (Overall)	5.6

WinSAT is an older Windows assessment. Treat it as a supporting indicator, not a modern benchmark. Often unavailable on newer Windows.

9. Motherboard / BIOS

Motherboard	HP • 8292
BIOS Version	P78 Ver. 01.48
BIOS Date	2023-10-05
Serial Number	5CG8366N0C

Helps identify the exact machine, check firmware updates and verify authenticity.

10. Windows and Security

Windows Edition	Microsoft Windows 11 Pro
Windows Version	10.0.26200
Activation	Activated
TPM	Present • Ready: True • Spec: 7.62.3126.0
Secure Boot	Disabled

TPM 2.0 + Secure Boot are important for modern Windows security and official Windows 11 support.

11. Network

Adapters	Ethernet • Intel(R) Ethernet Connection (4) I219-V • Disconnected • 0 bps Wi-Fi • Intel(R) Dual Band Wireless-AC 8265 • Up • 144.4 Mbps
----------	---

Confirm Wi-Fi, Ethernet and Bluetooth work with a real connection before purchase.

12. Suitability Summary

Office work	Good
University / study	Good
Programming	Light programming

Gaming	Integrated only — light / older games
Photo / video editing	Limited

13. PHYSICAL CHECK — DO THIS BEFORE PAYING

Screen	TEST	Dead pixels, brightness, bleed, flicker, cracks, hinges
Keyboard / Touchpad	TEST	Every key, click, multi-touch, no random movement
Ports	TEST	USB, USB-C, HDMI, audio jack, charging port, SD slot
Camera / Mic / Speakers	TEST	Record and playback
Wi-Fi / Bluetooth	TEST	Connect to real devices
Thermals	TEST	Fan noise and temperature under load
Charger	TEST	Original preferred, correct wattage, stable charging
Body / Hinges	TEST	Cracks, loose hinges, missing feet, swelling, liquid signs

Used Laptop Inspector v3.0 • Generated locally • Read-only inspection • Values depend on Windows/firmware availability
